

## **2012 Cancer Grant Recipients**

### **Dr Elgene Lim**

Ludwig Institute for Cancer Research, Vic

Exploiting DNA repair deficiencies in non BRCA associated breast cancer.

### **Dr Alexander Menzies**

Melanoma Institute Australia, NSW

Targeting the MAPK pathway in melanoma; mechanisms behind drug response resistance.

### **Dr Rishi Kotecha**

Princess Margaret Hospital for Children, Perth, WA

A Prospective Study to Evaluate the Immunogenicity and Efficacy of Inactivated Trivalent Influenza Vaccine (TIV) in children (6 months to 18 years of age) who have Undergone Allogeneic or Autologous Haematopoietic Stem Cell Transplant (HSCT) compared to Aged Matched Controls.

### **Dr Shahneen Sandhu**

Peter MacCallum Cancer Centre, VIC

Prognostic and Predictive Utility of Circulating Melanoma Cells and Plasma Circulating Free DNA in Patients with Advanced Melanoma Receiving BRAF Inhibitor Treatment.

### **Dr Kate Webber**

Prince of Wales Hospital, NSW

Genetic determinants of clinical phenotypes following cancer treatment.

### **Dr Ru-Wen Teh**

Sir Charles Gairdner Hospital, WA

Retrospective evaluation of markers of DNA repair competency in primary triple negative breast cancer: breast cancer outcome following standard adjuvant chemotherapy in tumours with or without competency of DNA repair.
